The Idea

Designer
Mark Braun

Founder
Paul Gummert

**Furniture likes categories:
work here, living there, crea-
ting elsewhere. Everything
neatly filed away. Pick a lane.
But we're tired of choosing,
we want furniture that moves
naturally between all of them.
We never fit in one lane, so
we stopped looking for furni-
ture that did.**

Together with designer Mark Braun, we studied the archetypes of workshop furniture and the principles of design furniture. Kept what worked. Questioned what didn't. And treated function and aesthetics as what they should be: One. [#studio.mark.braun](#)

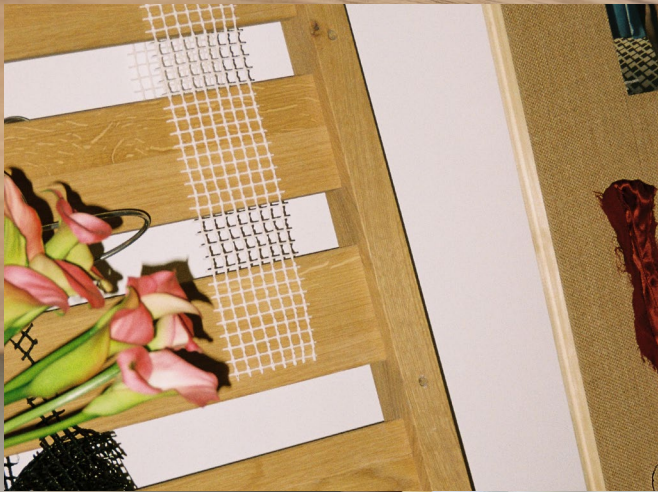

The System

Most systems come with rules. Ours likes options. Use one piece on its own, combine a few or keep adding as things change. Everything is designed to work together, move around and take on new roles without locking anything into place. The result can grow, shrink, shift and adapt to whatever is happening around it. The system follows what you're doing. Not the other way around.

The Bench

Made for what's next.

A lot happens around The Bench. That's kind of the point. Workbench, creative space, table – it doesn't care much for categories. Three sizes and different worktop surfaces adapt to different spaces, projects and demands. The tray keeps things in order below, leaving the surface free for whatever takes shape above. Built to be used, not spared. Solid, strong and timeless. It sets the stage and leaves it at that.

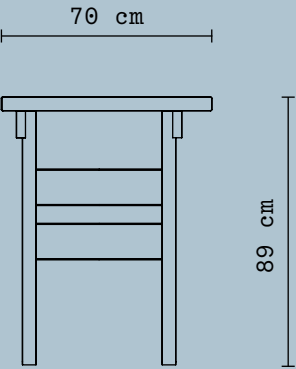

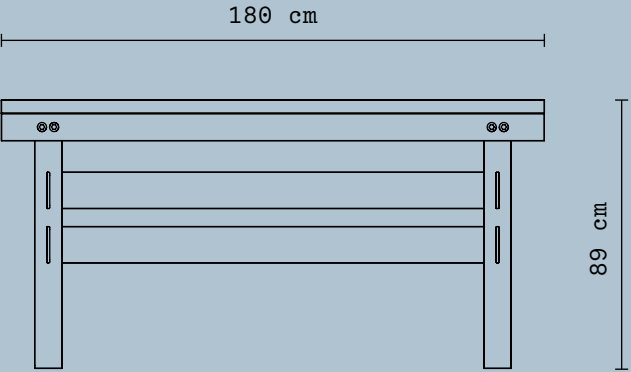

The Bench

Dimensions: W 180 x D 90 x H 89 cm
Material: solid oak, oiled
Load Capacity: 800 kg
Weight: 91,2 kg
Options: 3 different tops, 3 different trays, widths 140 / 160 / 180 / 200 / 220 cm

The Wall Bench

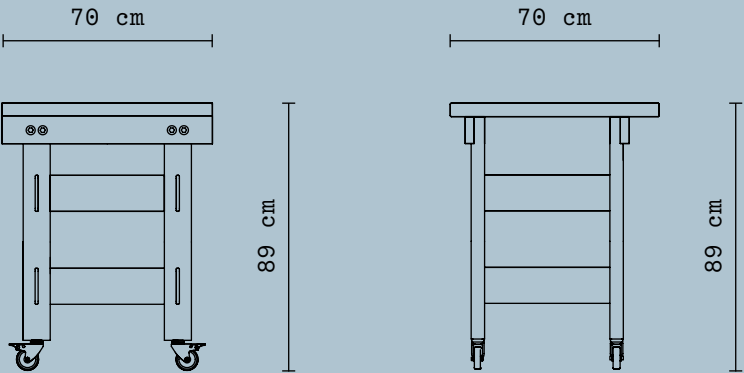

Dimensions: W 180 x D 70 x H 89 cm
Material: solid oak, oiled
Load Capacity: 800 kg
Weight: shelves 81,7 kg
Options: 3 different tops, 3 different trays, widths 140 / 160 / 180 / 200 / 220 cm

Coming soon: Height options.

The Block Bench

Dimensions: W 70 x D 70 x H 89 cm
Material: solid oak, oiled
Load Capacity: 200 kg
Weight: shelves 30,4 kg
Options: 3 different tops, 4 different trays

A workbench is technically a table. It’s just been called a bench for a few hundred years. Apparently, once you start working on a table, it needs a tougher name.

What happens on top is up to you.

The Setup

Different work asks for different things. Choose the surface, tray and The Units that suit what happens on top and around it. There's more than one way to make The Bench work for you.

Options Tops

solid oak,
oiled

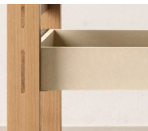

stainless steel,
hot rolled

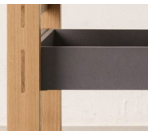

solid surface

Options Trays

sand

grey

black

stainless steel
(available for
Block Bench)

The Stool

Sits well. Anywhere.

The Stool doesn't need much of a reason to be there. Based on the familiar workshop stool, wood and stainless steel turn a simple archetype into a piece of industrial design that feels familiar without belonging to a particular time. Height-adjustable and robust, it's made for sitting, making, working and whatever else happens at stool height. And when nobody's sitting, something else usually finds its way onto it. Never in the way. Here to stay.

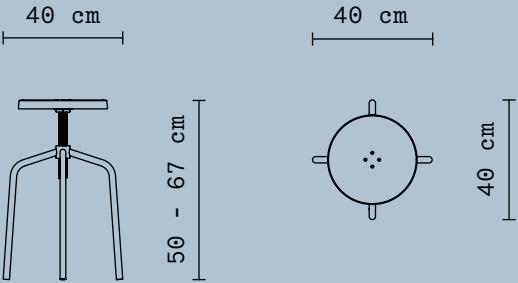

Dimensions: W 40 x D 40 x H 50 - 67 cm

Material: stainless steel, solid oak, oiled

Load Capacity: 120 kg

Weight: 5,5 kg

Options: —

Take a seat. You're done.

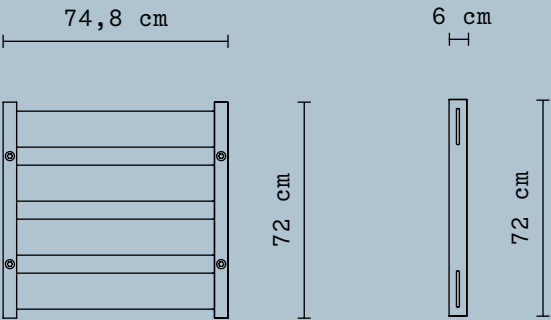

The Wall

Room to grow.

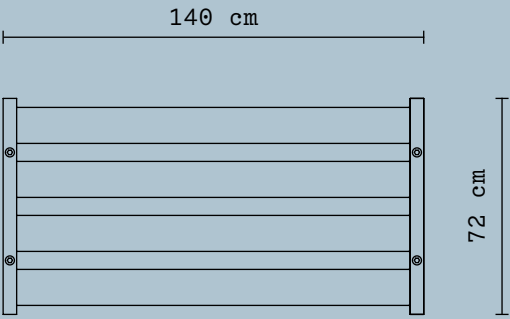

Usually, walls limit rooms. The Wall turns that limit into more space. Tools, materials and stuff move off the worktop and onto the wall, right where they're needed. The Units hook in, move around and adapt to whatever happens in front of them. Solid oak and two widths make it work for different setups. Turns out, space doesn't end at the wall.

Dimensions: W 74,8 x D 6 x H 72 cm / W 140 x D 6 x H 72 cm
Material: solid oak, oiled
Load Capacity: 100 kg
Weight: 7,5 kg / 11,8 kg
Options: 2 different widths

Width 1

Width 2

The wall stays put. Pretty much everything else doesn't have to.

The Setup

The Wall is only the starting point. Choose a width and add what you need, where you need it. The rest is deliberately left open.

Options Width

74,8 cm

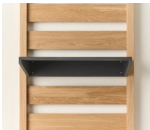

140 cm

Stine works with flowers, branches and whatever else an installation calls for. On The Wall, tools and materials become part of the work itself. Turns out, a wall can hold an idea too.
#studiofloer

Never just
one idea

Made to hold. Not just to store.

The Rack

Everything hangs on it.

There it stands. Solid, reliable and somehow running the whole system. The Rack is the backbone of the Foyos System. The Shelf, The Corpus, The Unit – everything hooks in, moves around and finds its place. The ladder principle keeps things organised without fixing them in place. And while everything around it keeps changing, it simply keeps things together.

Dimensions: W 74,8 x D 6 x H 230 cm
Material: solid oak, oiled
Load Capacity: 150 kg
Weight: 32 kg
Options: —

Shelf, Corpus, Units. Same Rack,
quite a few ways to put it to work.

The Setup

Start with the backbone. Add a Shelf, a Corpus or the Units that fit the job. What it becomes depends on what you need from it.

Add-Ons The Corpus

3 shelves,
horizontal

2 shelves,
horizontal,
left-hinged door

2 shelves,
horizontal,
right-hinged door

2 drawers,
horizontal,
top with 2 internal
drawers

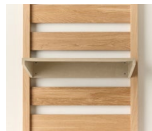

3 drawers,
vertical use on the
right hand side

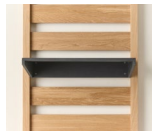

3 drawers,
vertical use on the
left hand side

The Corpus

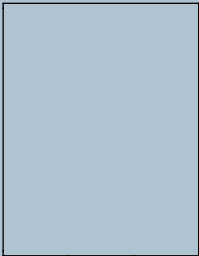

Storage. Hard to put in a box.

The Corpus turns structure into furniture. It gives The Rack a front, puts things out of sight and opens up entirely new uses for the system. Different configurations make it just as comfortable in a workshop, living space or atelier. Robust, through-coloured MDF and heavy-duty runners are made for considerably more than careful opening and closing. It stores things. Just don't mistake it for a cabinet.

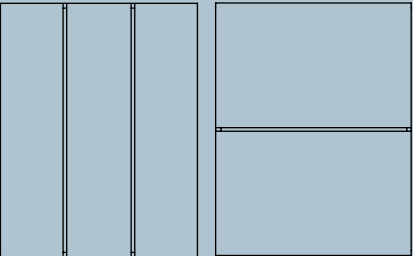

Dimensions: W 65,2 x D 46,4 x H 84,4 cm
Material: high-density MDF, solid-colored
Load Capacity: 100 kg
Weight: 34,7 kg
Options: 6 layouts, 3 different colourways

Doors

Drawers

Corpus is Latin for body. Which makes calling it a cabinet feel even more inappropriate.

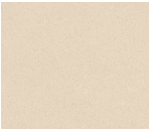

The Setup

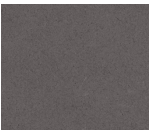

What goes inside starts with what you choose outside. Open, closed, drawers or shelves – choose the configuration around what you want to keep, hide or have at hand.

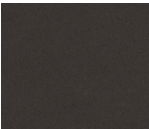

Options Colours

sand

grey

black

The Shelf

Adding depth. Literally.

Literally. The Shelf keeps things. Simple as that. It hooks into The Rack or The Wall, carries what needs carrying and moves when things change. Through-coloured MDF makes it robust, durable and pleasantly unfussy. Two widths, three colours and dimensions that work with plenty of standard storage formats. No complicated mechanics, no fixed position, no showing off. Just a shelf doing its job remarkably well.

Dimensions: W 65,2 x D 36 x H 12 cm / W 130,4 x D 36 x H 12 cm

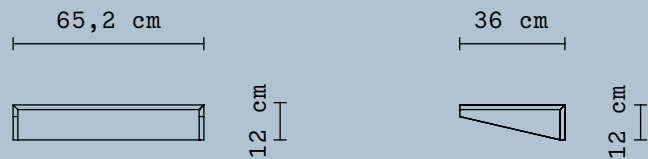

Material: high-density MDF, solid-colored

Load Capacity: 30 kg / 40 kg

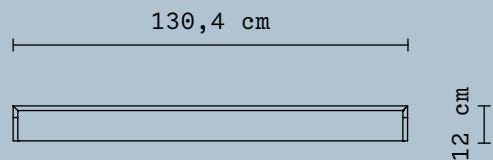

Weight: 6,7 kg / 12,7 kg

Options: 2 different widths

Width 1

Width 2

One shelf is a shelf. A few start to become a system.

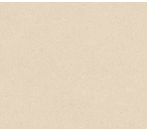

The Setup

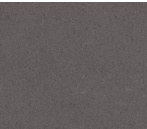

Simple doesn't mean one-size-fits-all. Choose the size and colour that work with your space and the things you want to put on it. Simple enough.

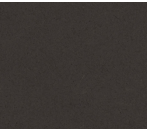

Options Colours

sand

grey

black

Options Widths

65,2 cm

130,4 cm

coming soon:
depth 24 cm

The Units

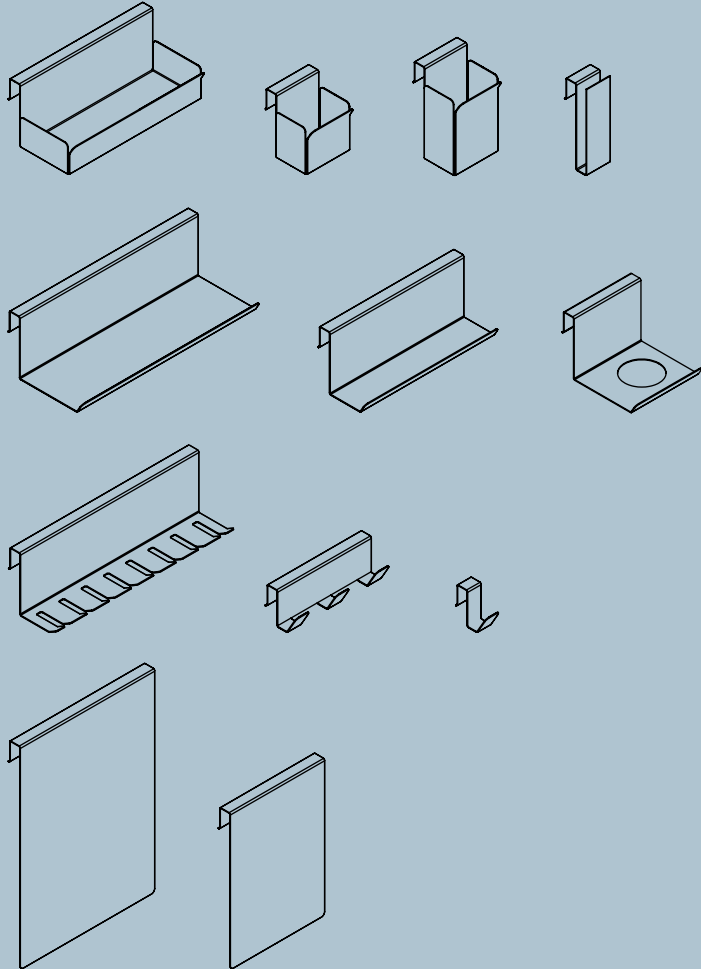

Seamless. More to work with.

The Unit is storage that goes exactly where it's needed. Boxes, trays and holders keep everything from tools to small parts close at hand, hooked onto The Bench, The Wall, The Rack or inside The Corpus. Each Unit is folded from a single piece of 1.5 mm stainless steel, with no welded seams. That makes it remarkably robust, easy to clean and ready to be moved, rearranged and used again and again. With plenty of options, there's a Unit for almost everything. The system is in the details.

Material: stainless steel

Options: 12 different sizes and functions.

Unit Options

Unit originally meant a single thing considered as part of a whole. We really couldn't have named it much better.

The Setup

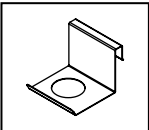

Small parts. Plenty of possibilities.
Boxes, trays, holders – pick what
fits the things you work with and
put them where they make sense.

Working on
more

Esential CPH x Foyos

A workbench usually comes with a pretty good idea of what happens on top. The Bench doesn't. Different surfaces make room for different kinds of work. What that turns into is another matter.
#esential_cph

Hello

Unexpected at the end.
Of course we like that.

You've seen what's ours. So:
What's yours?

A space. An idea. A project. A vision.
Something already taking shape.
Or something that still needs to?

Let's talk
about it
